Schrader can provide you with spare parts and accessories for former machines made by **MONARCH / MONAFLEX and OTHER MARKS** of machines using Airbags.

TECHNICAL ASSISTANCE AND TRAINING

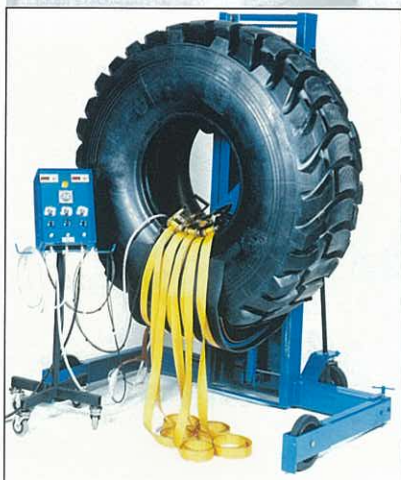

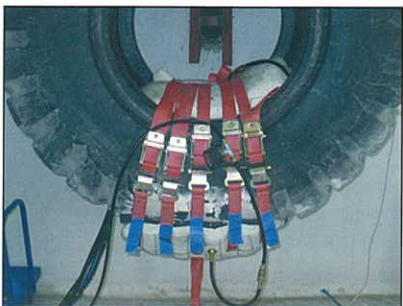

Our TRAINING CENTRE has been set up to teach our customers the skills required to use Schrader and Michelin products.

Particularly regarding the cold and hot repair of tyres

Already active in the passenger cars and trucks market, Schrader is targeting new development in **earth-mover market**.

The EM tyre shortage and the raw material price increase have resulted to a higher demand in tyre repair among mining companies, international contractors, tyre repair specialists.

Schrader can offer a one stop shop concept including a wide and professional product line, workshop setup and training.

When repairing, we recommend wearing goggles, gloves and ear protection.

Vulcanizers: Maximum pressure supply 2,5 bar with filtered and non-lubricated air.
