

### TYRES AND TUBES REPAIR

Aware of the legislation evolution and the "CMR" decree, Schrader offer a range of alternative products chlorine and aromatic hydrocarbon free.

Each repair type has a corresponding Schrader product:

- depending on the type of tyre to be repaired, up to 63"
- depending on the type repair: puncture or injury.

Several possibilities:

- PRP, plug repair patches "mushrooms"
- Patches
- All repair products (solution, cushion gum, filler compound...)
- Injuries skiving tools
- Vulcanizing machines
- Stands, vulcanizers and special appliances

Our patches conform to repair standard ECE-R108 et R109.

### LE GUIDE DE LA REPARATION DES PNEUMATIQUES

Manuel technique réalisé à l'intention des spécialistes du pneu et de leurs ateliers de réparation.

LES PROFESSIONNELS DU PNEU

*Technical Assistance And training*

Our TRAINING CENTER has been established to teach our customers the necessary skills to use Schrader and Michelin products.

Particularly for cold and hot cure tyre repairs.

The labelling symbols for high-risk products are given for information purposes only.

The products are liable to change and their safety data sheets are available on request.

When repairing, we recommend wearing goggles and gloves.

### STORAGE OF TYRE REPAIR PATCHES:

To maintain with the expiry dates, we recommend that you store the pieces and the solution:

- In a clean dry place.
- Away from sunlight and heat.
- Recommended temperature: between 15 and 25° C.
